

The ResC4EU Platform: Strengthening SME Supply Chains

White Paper, February 2025, GreenTwin GmbH

ResC4EU (Resilient Supply Chain for Europe) is a *Collaboration and Support Action* funded by the European Commission to help SMEs enhance the resilience of their supply chains. Launched in January 2024, this initiative will run for three years, providing SMEs with the tools and connections needed to deal with supply chain challenges.

Global Disruptions Impacting Supply Chains

The first year of ResC4EU was shaped by geo-political and climate-related disruptions, including the ongoing war in Ukraine, the Red Sea crisis, extreme weather events like floods in Spain and heatwaves disrupting logistics. As we enter year two, new challenges emerge, such as the U.S. imposing tariffs on China, Canada, Mexico and possibly also the EU.

How the ResC4EU Platform Empowers SMEs

The ResC4EU platform is designed to help SMEs across various sectors – including manufacturing, aerospace, electronics and more – to build resilient supply chains. Through the platform, SMEs can:

- Publish their offerings - Present core products and services.
- Introduce their business – Highlight company capabilities and certifications.
- Find the right partner – Use Smart Search to explore suppliers, products and services.
- Negotiate and collaborate – Connect and establishing terms with potential business partners.
- Improve supply chain sustainability and resilience – Through tailored recommendations.

The ResC4EU Platform – Empowering Technology Providers & Innovators

In 2025, SMEs and supply chain leaders must prioritize on technology innovation and resilience to stay competitive. The ResC4EU platform is a means of collaboration for technology providers, innovators and consultancies to build stronger partnerships with SMEs.

Through the platform, technology providers, innovators and consultancies can:

- Present technology solutions – Showcase technology capabilities that mitigate vulnerabilities, risks and disruptions.
- Build credibility – Add references and describe their technology expertise.
- Match with SMEs – Connect with businesses seeking supply chain solutions.
- Lead the digital transformation - Position themselves at the forefront of supply chain innovation.

The ResC4EU Platform – Empowering SMEs Seeking Technology Advancements

SMEs can leverage the platform to identify risks, map suppliers, and get access to tailored resilience strategies. Key benefits of using the platform and its tools include:

- Confidential risk assessment - Highlight risks, and disruptions in their supply chain.
- Supplier mapping – Identify and track core suppliers for better understanding of supply chain risks and mitigation options.
- Shape the future of supply chains – Contribute to new resilience tools tailored to SMEs needs.
- Resilience strategies - Gain tailored insights through our upcoming services.

Join the Future of Supply Chains

- Register your company – Provide your VAT number, business details and authorized users:
