

# Resilience Assessment model

## Supply chain Vulnerabilities

- Input Vulnerabilities
- Output Vulnerabilities

Vulnerabilities refers to *weaknesses, gaps or complexities* that make an enterprise susceptible to disruptions.

Resilience Assessment Score

0.76

## Supply chain Capabilities

- Proactive capabilities
- Reactive capabilities

Capabilities or solutions refer to the *attributes: skills, resources, competencies or capacities* that enable an enterprise to anticipate and overcome disruptions.

Our model provide **resilience self-assessment** services tailored specifically for SMEs:

- enabling them to effectively strategize against supply chain and transportation disruptions.
- empowering businesses with insights and tools to enhance their resilience.

**Key features** include:

- Supply chain Resilience Assessment Score
- Support in Identifying Supply Chain Vulnerabilities, Operational Disruptions and Supply chain capabilities
- Visibility and GWP Assessment Across Your Supply Chain
